This is a cute and flirty beret with enough interest to keep you knitting straight on through the night. It can be worn slouchy in the back or pulled to the side for an asymmetrical effect. The little cable pattern worked throughout makes a terrific texture and an engaging knit. It is easy to work without a cable needle or any additional tools and the repeat is easy to remember and complete on the go. Grab a project bag and carry this little cutie with you in your purse.

stitches used

RTC (Right Twist Cable) Worked over the next two sts; K in back of second st without removing, k first st, remove both sts from needle.
