

General information

The quantities of yarn are based on average requirements and are therefore approximate. It is essential to work to the stated tension and you should always knit a tension square before starting. If you have too many stitches to 10cm/4ins your tension is tight and you should change to a larger needle. If there are too few stitches, your tension is loose and you should change to a smaller needle.

We cannot accept responsibility for the finished product if any yarn other than the one specified is used.

Instructions given are for the first size, with larger sizes in round brackets. Where only one size is given this applies to all sizes. Work all directions in square brackets the number of times stated.
